Roshan

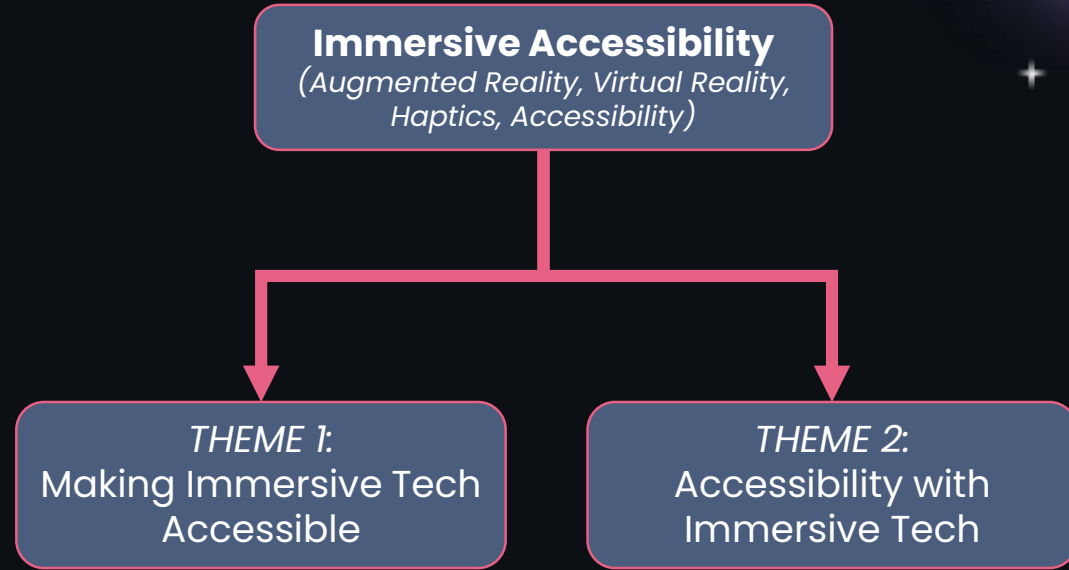

Roshan/RIT areas of research

Assistant Professor
- RIT iSchool

Co-director of the
En-Ability Lab

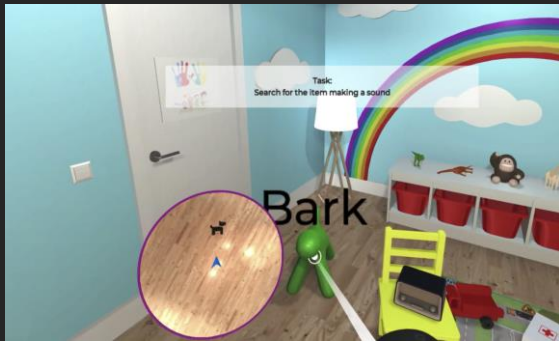

General Research
focus on HCI,
Accessibility and XR

Example Research Projects

THEME 1:

Making Immersive Tech Accessible

SoundVizVR

In this project we explore making various sound cues in virtual reality accessible for Deaf or Hard of Hearing VR users. We explored several minimap and on-object based visualizations with text and icons to represent different sound types

@ASSETS 2022

THEME 2:

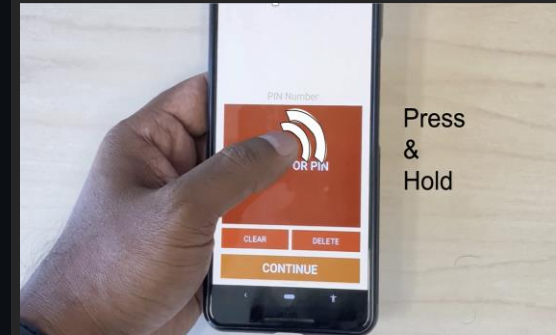

Accessibility with Immersive Technologies

HapticCaption

Haptic Captioning is project that looks at enhancing captions for deaf or hard of hearing users. Using vibrotactile feedback, we explore presenting speaker identification and vocal emotion information that can improve the accessibility of captions.

@CHI 2023

OneButtonPIN

In OneButtonPIN, we aim to make PIN based authentication accessible for blind and low vision users. We present a single button which when pressed, held and released can input digits of the PIN codes.

@MobileHCI 2022 – Best Paper Award

02

Background

The Seed of the Idea

Interest in Video Games

What's out there?

Controlled Environment

92%

of People with Disabilities played video games regularly in a Netherlands study, (Chin, Wing 2021)

41%

Average of children and adolescents with autism who spend the majority of their free time playing video games versus 18% of youths in the general population (Mazurek, Shattuck, Wagner, and Cooper 2013).

Engagement With Virtual Reality by Age

Industries Expected to Face the Most Disruption by Immersive Technologies

Besides Gaming and Entertainment

INITIAL RESEARCH

Anyone else doing this?

Who's an expert?

Connection with RIT

The RIT logo consists of the letters "RIT" in a white, serif font, centered on a solid orange square background.

RIT

The CAIR logo features a stylized graphic of overlapping triangles in orange, white, and blue to the left of the text "CAIR" in a large, black, sans-serif font.

CAIR

Center for Accessibility
and Inclusion Research

INITIAL PLANNING-

Introduction through RIT's
Frameless XR Labs

03

Results

Phase 1: WE GOT JOB COACHES INVOLVED

Conducted a workshop

- - Understanding the process
- - Trying out scenarios
- - Brainstorming

USE IN BOCES CLASSROOMS

USE IN ASSESSMENTS

JOB SIMULATOR

- Software is \$20
- Takes 1-2 hours to set up and get going
- Job Simulator has 4 different job types
- Headsets are \$399
- Can be billed as observations through OPWDD
- Can also use for VR, High School Programs

AUTO MECHANIC

STORE CLERK

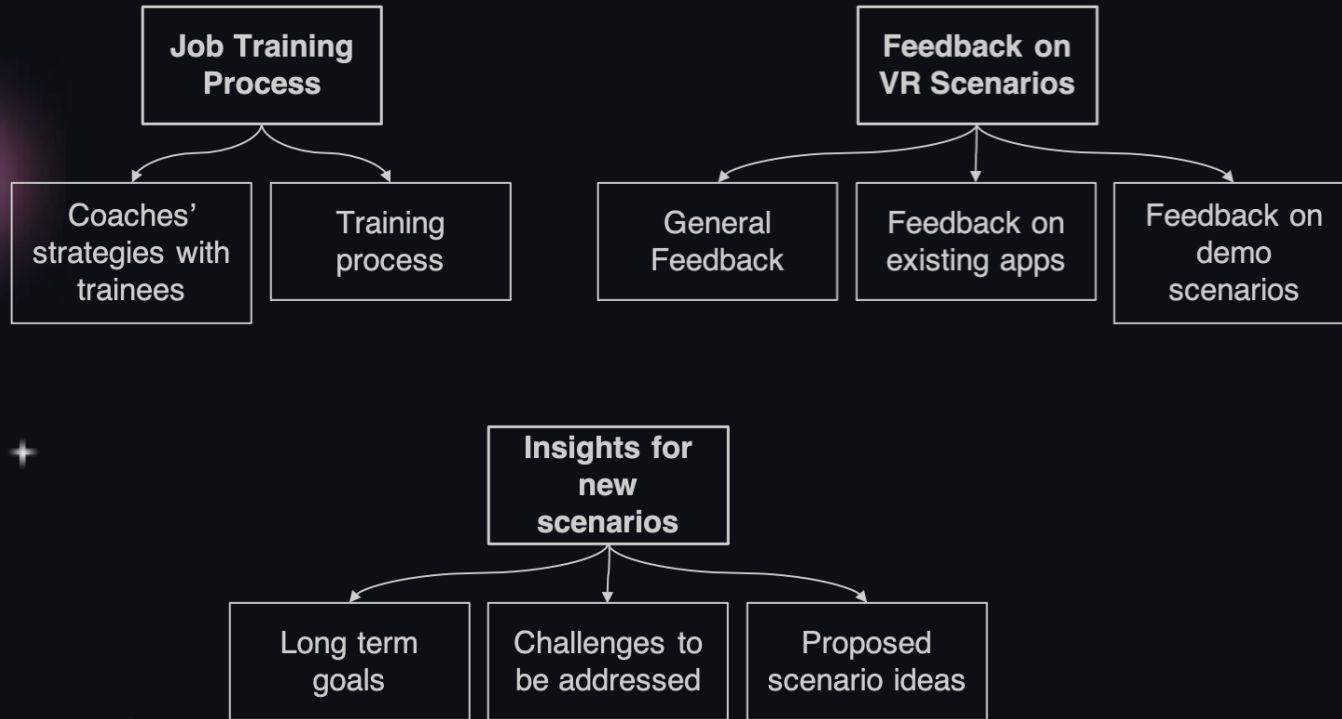

OFFICE WORKER

Scenarios

Findings from Phase 1

Phase 2: New platforms with Trainees

Trainees explored two different platforms

- Job Exploration Platform
- Soft Skills Training Platform

Job Exploration Platform

A platform to let trainees immersively explore different jobs

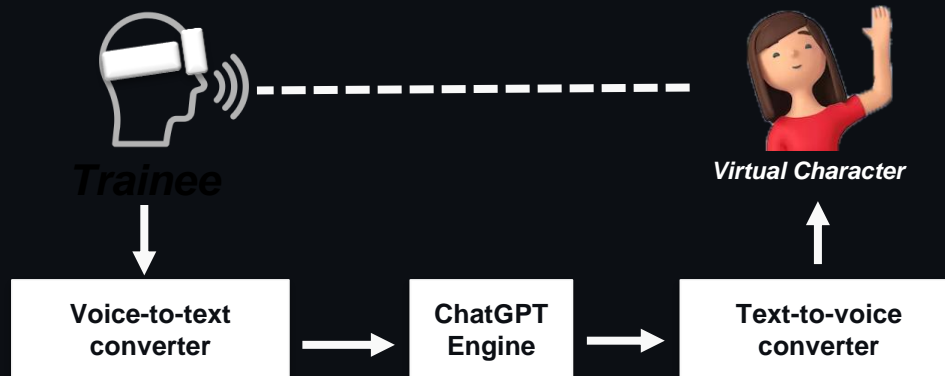

Job Exploration Platform

Soft-skills training platform

- A platform to train conversational skills of trainees.
- We use ChatGPT engine as the conversational interface.
- Scenarios can be created using 'text prompts'

Soft-skills training platform

Findings from Phase 2

- **Job exploration**
- **Chat Bot**
- **Other applications**

Takeaways

Excitement

**Group
Dynamics**

Ease of Use

**Job
Coaches**

04

Future

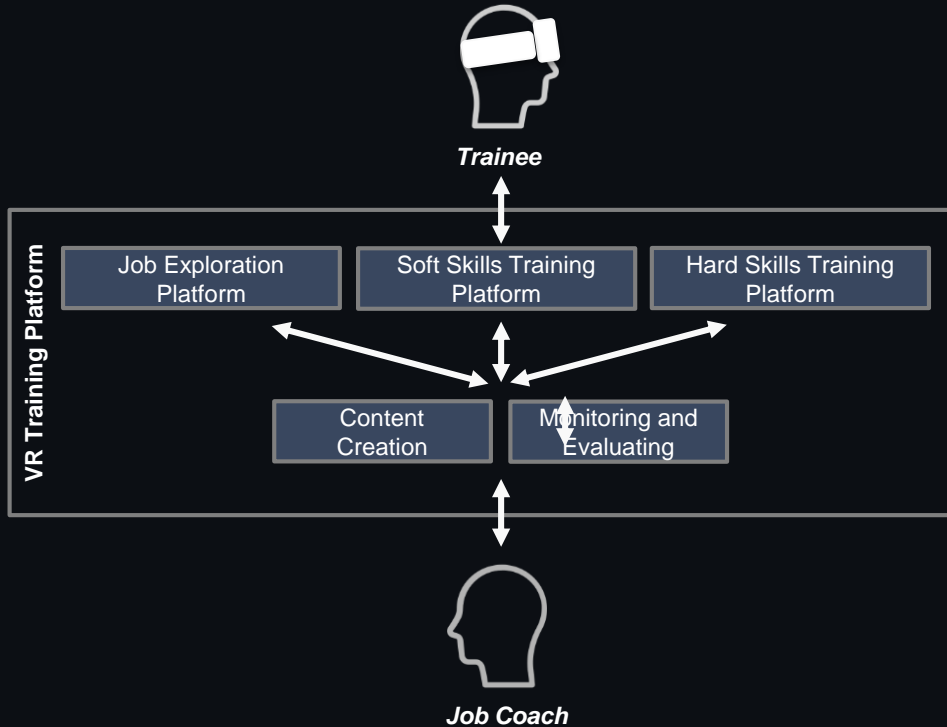

FUTURE PLANS

Creating custom training scenarios

Exploration of the effect of haptics

Future Plans

Fully integrated platforms with tools for job coach and trainees

Tools for job coaches to create content and monitor the training progress of the trainee

FURTHER RESEARCH AREAS

Customized/localized
content

Job Coach Training

Study effectiveness
across groups

FURTHER RESEARCH AREAS

Partnerships with NYS

Partnerships with Meta

**DO YOU WANT
TO BE A PART
OF THIS?**

Q AND A

WANT TO TRY THEM OUT?
